© Maritime Intelligence Ltd 2019
MARITIME SECURITY SUPPORT SERVICES
MCJ Ref No: 1160/E/01
Tender Ref No: 161270-2019
Project Stage: Early Information
Area: Belgium, Brussels
Value: 3,800,000 EUR
Promoter: The European Union, represented by the European Commission on behalf of and for the account of the Economic Community of Central African States (ECCAS), Brussels, Belgium
Profile: Technical assistance to implement the Support Programme to the Maritime Security Strategy in Central Africa (PASSMAR). Mobilisation of technical assistance to support the project. Management, coordination and supervision of the entire project implemented under direct management (P1.1, P1.2, P1.3) will be carried out by the long-term technical assistance team in close coordination and collaboration and, where appropriate, under the supervision of the SG-ECCAS. Given the project’s strong inter-institutional and inter-state dimension, technical assistance must rely on close collaboration with/between stakeholders, and must facilitate permanent understanding and simultaneous support for the structures concerned. This dialogue will be based on the institutional and political legitimacy of ECCAS and its General Secretariat, which will facilitate authoritative communication and close collaboration of the project with all stakeholders of ECCAS and its member states. Scheduled date for publication of the contract notice: 01.05.2019. NOTE: Applications or requests for information must not be sent at this stage
Tender Details: Reference No: EuropeAid/140226/DH/SER/MULTI
Dated: 08/04/2019

QUAY WALL CONSTRUCTION
MCJ Ref No: 1160/E/02
Tender Ref No: 161309-2019
Project Stage: Early Information
Area: Netherlands, Rotterdam
Promoter: Havenbedrijf Rotterdam NV, Wilhelminakade 909, Rotterdam, 3072 AP, Netherlands
Tel: +31 650285969; E-mail: aanbestedingen@portofrotterdam.com
Contact: Ingrid Das
Profile: Market consultation on a sustainable quay wall. Construction of a quay wall in the Tennesseehaven in the Port of Rotterdam with a length of approx. 350m and a construction depth of approx. -16.50m NAP. Estimated date of publication or contract notice: 30/06/2019
Dated: 08/04/2019

DREDGING & PORT SERVICES
MCJ Ref No: 1160/E/03
Tender Ref No: 160969-2019
Project Stage: Early Information
Area: Germany, Hamburg
Promoter: Hamburg Port Authority, Anstalt öffentlichen Rechts, Neuer Wandrahm 4, Hamburg, 20457, Germany. Tel: +49 4042847-3911; E-mail: ZentralerEinkauf@hpa.hamburg.de
Contact: Zentraler Einkauf
Profile: Services to ensure that excavated dredged material receives correct treatment, recycling and correct disposal. Also includes engineering services, surveying services, transport services, planning services, maintenance and repair services, cleaning services and winter maintenance, carrying out internal transport services on interim storage or online installations, transport of waste for recovery and storage (dredged material) and sand within the plants and over public roads and other general cleaning and maintenance
Dated: 05/04/2019
**WHARF CONSTRUCTION WORKS**

**MCJ Ref No:** 1160/E/04  
**Tender Ref No:** 150183-2019  
**Project Stage:** Early Information

Tender Deadline: 15/04/2019 – NOTE IMMINENT DATE

DIVING/LIFE SUPPORT EQUIPMENT
MCJ Ref No: 1160/X/56
Project Stage: Tenders Invited
Area: UK, Bristol
Source: Promoter
Value: £18,000,000
Project Period: Start: 01/01/2020 - End: 01/01/2025
Promoter: Ministry of Defence, Ships, Maritime Combat Systems (MCS) Team, Birch 1B #3133, NH3 Abbey Wood, Bristol, BS34 8JH. Tel: +44 306 798 7542; E-mail: charlotte.thompson358@mod.gov.uk
Contact: Stuart Carr
Profile: Procurement & Reliability In-Service Support of Diving & Life Support Equipment. The requirement under UEW/012 is for a single supplier framework agreement for the provision and in-service support of non-complex diving equipment. This includes: Diving Clothing, Dive Ancillaries, Explosive Ordinance Disposal (EOD) Ancillaries, Explosive Ordnance Disposal (EOD) Tools, Sonar Marker Mine Recovery Outfits (SMMRO), Hydraulic Tools, Cylinders, Diver Compressors, Dive Pumps. The scope of the Contract is expected to expand as the Authority intends to procure several diving equipments over the duration of the Contract. The Authority will be responsible for procuring new to service equipment, following an initial bedding-in period responsibility for further procurements and in-service support of that equipment will be passed to the Contractor under UEW/012. Over the course of the Contract the Contractor will be expected to sub-contract with the Authority's nominated supplier to enable further procurements and provide in-service support to that equipment. The specification of these additional equipments is not defined at this point but may include the following: Hand Held Sonar, Heated Diving Gloves. In-service support includes: Supply Chain Management, Engineering Support, Post Design Services, Repairs and Modification, Spares provisioning, Safety Management, including maintenance of a Safety Case in accordance with DEF STAN 00-56. Obsolescence Management, Quality and Configuration Management, Technical Documentation Management, Training. To show your interest, please go to:

**VESSEL & CREW CHARTER**

**MCJ Ref No:** 1160/E/07  
**Tender Ref No:** 166731-2019  
**Project Stage:** Tenders Invited  
**Project Period:** Start: 01/08/2019 - End: 30/09/2019  
**Promoter:** Høvdingselskapet, 971349077, Postboks 1870 Nordnes, Bergen, 5817, Norway  
**E-mail:** caspar.christie@hi.no  
**Contact:** Caspar Christie  
**Profile:** Contract for the hire of a vessel for the Mareano Mission 2019. The Mareano programme is multi-disciplinary and multi-institutional, and the mapping is carried out in collaboration between the Norwegian Mapping Authority, the Geological Survey of Norway and the Institute of Marine Research. The programme is managed by a Programme Group, whilst five ministries make up the Steering Committee. The mapping of the seabed's geological, biological and chemical environment shall be carried out in areas where the Mareano programme has established high-resolution bathymetric charts based on measurement administered by the Norwegian Mapping Authority. The mapping of the seabed's geological, biological and chemical environment is carried out by using several tools such as a bottom dredge, a core sampler, a beam trawl, sledge, HD video recordings of the seabed, as well as a bottom penetrating echo sounder and oceanography instruments/CTD. The Institute of Marine Research wants to hire vessels for a research mission. Location: The maritime zone north of the Barents Sea, with start and end of the mission at a quay in Tromsø. The mission takes place in the Barents Sea north of Svalbard for a period of approx. 3 weeks in the period August-September. The start and end of the mission will be at a quay in Tromsø. The aim of the Mareano mission is to map the seabed's geological, biological and chemical environment in order to generate knowledge for the work on the management plans for Norwegian sea areas in accordance with identified mapping needs. Knowledge regarding the Mareano project is continually published on, amongst other things, at www.mareano.no The procurement documents are available for unrestricted and full direct access, free of charge, at: https://permalink.mercell.com/103085047.aspx

**HARBOUR ENTRANCE BARRIER**

**MCJ Ref No:** 1160/E/09  
**Tender Ref No:** 166651-2019  
**Project Stage:** Tenders Invited  
**Area:** Netherlands, Den Helder  
**Promoter:** Koninklijke Marine, Rijksmarine- en Zeehaven 1, 1780 ZZ Den Helder, Netherlands  
**Tel:** +31 223651733; E-mail: je.hendriks@mindef.nl  
**Contact:** Dhr. Erik Hendriks  
**Profile:** Floating Barrier for Harbour Protection. This tender comprises the delivery and installation of 1 no. floating barrier for protecting the naval harbour in Den Helder, the Netherlands, preventing the entry of unwanted vessels. The barrier should stop all types of vessels, regardless of the propulsion. The barrier will be permanent in nature, but it must be possible to open and close the barrier in an easy and safe way, for passing naval and other ships. The total length of the barrier is approx. 1,200m. The barrier has to be environmentally friendly and as silent as possible, above as well as under the water. The installation of the barrier, using existing infrastructures, is part of the scope of supply. In the award phase a site visit will be possible, to view the location where the barrier is to be installed. ### Oil Spill Vessel Services

**Tender Ref No:** 1160/E/18  
**Project Stage:** Tenders Invited  
**Area:** Portugal, Lisbon  
**Value:** 10,080,000 EUR  
**Project Period:** 60 Months  
**Promoter:** European Maritime Safety Agency, Praça Europa 4, Lisbon, 1249-206, Portugal  
**E-mail:** CPNEG012019@emsa.europa.eu  
**Contact:** Mr Frédéric Hébert - Head of Unit Pollution Response Services  
**Profile:** Service Contracts for Stand-by Oil Spill Recovery Vessel(s). The primary objective of EMSA stand-by oil spill recovery vessel service under this procurement procedure is to protect the coastlines of EU Member States, in accordance with EMSA founding Regulation 1406/2002/EC as amended. The Agency intends to establish, for certain defined areas of the EU coastline additional response capacity to that of the pollution response mechanisms of Member States in case of a major oil spill. This can be provided by either a single vessel or through a ‘pool’ of vessels arrangement. EMSA would like to utilise vessels that are engaged in economic activities, during the contract period, in the identified area, by establishing service contracts for their availability during a (major) incident for spill response activities. Following a request for assistance, such vessels would be transformed into oil recovery vessels and made available at short notice for at-sea oil recovery activities during a (major) oil spill. Lot No: 1: Adriatic Sea; Lot 2: West Mediterranean Sea, covering the European Mediterranean coastline from Algeciras (Spain) to Marseille (France) and including the Balearic Islands. Lot 3: Central Mediterranean Sea, covering the area limited by the following points: 1) A 39o00/N 11o30/E; 2) B 35o00/N 11o30/E; 3) C 35o00/N 18o00/E; 4) D 39o00/N 18o00/E

**Channel Dredging Works**

**MCJ Ref No:** 1160/E/20  
**Tender Ref No:** 156112-2019  
**Project Stage:** Tenders Invited  
**Area:** France, Montreuil-sur-Mer  
**Value:** 3,000,000 EUR  
**Project Period:** 6 Months  
**Promoter:** Communauté d'agglomération des Deux Baies en Montreuillois (BA2BM), Montreuil-sur-Mer, France. E-mail: marchespublics@ca2bm.fr  
**Profile:** Design & build contract to secure the north shore of the Bay d'Authie by dredging and stabilisation measures. The CA2BM has planned that the work will be carried out in summer 2019. The contract will involve carrying out an operation to protect part of the north shore of Authie Bay. This operation will consist of carrying out dredging of the order of 200,000m³ within a macrotidal tidal estuary. The objective is two-fold, firstly to restore a channel for the river that is sufficiently far from the dune cord and secondly to use the dredged material to re-sand the eroded area. This dredging will be accompanied by the installation of a channel maintenance device over a length of approx. 800m  
**Tender Details:** Open Procedure. Reference No: CA2BM-2019-03  
**Dated:** 04/04/2019  
**Tender Deadline:** 27/05/2019 - 12:00 Hrs
PORT DREDGING WORKS
MCJ Ref No: 1160/E/21
Tender Ref No: 151631-2019
Project Stage: Tenders Invited
Area: Italy, Gioia Tauro
Value: 2,536,000 EUR
Project Period: 36 Months
Promoter: Autorità portuale di Gioia Tauro, Contrada Lamia Gioia Tauro, 89013, Italy
Tel: +39 0966588644; E-mail: areatecnica@portodigioia_tauro.it
Profile: Three-year maintenance dredging works through 18 campaigns, 6 for each year, of the backdrops of the port of Gioia Tauro through the levelling of the dunes underwater. The contract concerns the ordinary maintenance of the seabed through the flattening of the submerged dunes. There are 18 dredging campaigns scheduled for a total of 3 years. Ordinary maintenance will take place every two months or as indicated by the client. The project foresees annually 2 levelling campaigns with self-loading and self-reflecting dredgers and 4 levelling campaigns also with a different means of self-loading and self-reflecting dredger. The procurement documents are available for unrestricted and full direct access, free of charge, at: www.portodigioia_tauro.it

MARINE CONSULTANCY SERVICES
MCJ Ref No: 1160/E/22
Tender Ref No: 151991-2019
Project Stage: Tenders Invited
Area: UK, Downpatrick
Value: £254,000
Project Period: 36 Months
Promoter: Department for Infrastructure, Rathkeltair House, Market Street, Downpatrick, BT30 6AJ
E-mail: SSDAdmin.CPD@finance-ni.gov.uk
Contact: Paul Clements
Profile: Marine Consultancy Services. DfI has a wide range of responsibilities including regional strategic planning, planning policy and legislation; transport strategy and sustainable transport policy; public transport policy and performance; management of public roads; road safety, vehicle and driver testing, driver licensing and enforcement; watercourse and coastal flooding; policy on water, sewerage services and drainage. As part of this DfI provide 2 public ferry services: - The Rathlin Island Ferry Service (RIFS) which provides a ferry between Ballycastle, County Antrim and Rathlin Island and - The Strangford Lough Ferry Service (SLFS) which provides a road ferry link between Strangford and Portaferry in County Down. The purpose of this contract is to provide the department with access to specialist marine engineering and naval architecture expertise to ensure that issues can be assessed and appropriately dealt with in a timely manner thus reducing the risk of delays or disruption in either ferry service. USVs
MCJ Ref No: 1160/E/25
Tender Ref No: 153103-2019
Project Stage: Tenders Invited
Area: France, Paris
Project Period: 60 Months
E-mail: bruno-h.chatelain@intradeff.gouv.fr; anne-claire.pichon@intradeff.gouv.fr
Contact: Bruno Chatelain; Mme Anne-Claire Pichon
Profile: Supply of surface drones, comprising two modes, one autonomous and the other remote-controlled, making it possible, in particular, to carry out bathymetric surveys as part of the operational activities of the French Navy and to perform related services. The market consists of the supply of new surface drones (USV: Unmanned Surface Vehicle) that are autonomous, adaptable and adaptable to the needs of different services. The largest dimension should be less than about 1.7m in transport configuration and less than about 2.2m in operational configuration so that drones can be handled by two or three people without handling means. The weight of the drone should not exceed 100 kg, excluding payload, and the drone can support a load of about 50 kg. As an indication, the USVs will be equipped with a Multibeam bathymetric system (including an inertial unit and a CTD (Conductivity Temperature Depth) probe) to be provided under the contract and sites allowing the addition of other payloads. The bathymetric sounder will map the seabed with a vertical precision of the order of one centimetre for a depth range of at least up to 250m. As an indication, each drone must be able to operate in autopilot mode and remotely remote-controlled mode with a range greater than 3 hours at nominal speed. In autopilot mode, the drones will be equipped with an anti-collision system and a point-finding system. The drone will have a weak draft and shall reach a nominal speed of 3 to 5 knots and a top speed of at least 10 knots. The drone can be deployed in different cases such as collecting information at a lake, a port or at sea. Associated services include training, mission preparation and management system, use and maintenance documentation, and spares

**Contact:** Bruno Chatelain, M. Éric Boubert  
**Profile:** Tenders are requested for the supply of 11 new operational small semi-rigid inflatable boats (RIBs), functionally similar to those currently in operation in the national navy and related services. These boats are intended to be embarked on a variety of navy vessels in service of the national navy (e.g. helicopters, test and measurement vessels, Lafayette type frigates and Horizon). Some of these boats are equipped with a max. payload capacity of up to 2.5 tonnes. They will carry out the activities of state at sea, self-defence of vessels, and rescue and assistance in man overboard situations. As an indication, they will be of an overall maximum length of 7m and will be operated by a crew of two persons; their motorisation, in board type, must allow good handling skills to reach approx. 30 knots in a rescue boat configuration with 5 persons on board and approx. 15 knots in operational configuration with 14 persons on board. Associated services include crew training, use and maintenance of documentation and changes
